‘Layer 8’ – the user – remains the weakest link in information security, and technology alone cannot not combat this.

Information security has to become a culture within the organisation – you need to implement **long-term change** rather than aiming for a quick fix.

It helps if the user training taps into **existing behaviours** rather than attempting to create new ones. Also, it is important to address your audience with appropriate, targeted training.

We need to build a wall. We need to MAKE SECURITY GREAT AGAIN! - "SA far from immune to cyber-attacks". Sad!

**InfoSecurity Skills
Drive on the Ground**

The Community Matters

A sense of belonging and working with like-minded people

A right channelling

Mentorship mentors and the need for incremental development

Technological Excitation and Being Hands-on

Young techies like the challenge

Some Opportunities

- A pool of skills/talent in one room for hire
- Setting and grooming talent of tomorrow
- Co-creative environment
- Tech forecasting and better planning
- Mindset shifting
- Stimulating and unearthing local security Innovation and Tools

**Future GeekStars, #gkVacWork:
InfoSecurity Skills Pipeline**

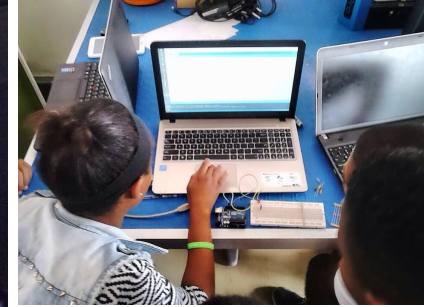

Capacity for the Future

A mission to groom Future **GeekStars**, enabling young Makers and Creatives.
